

## Products:

### Machined Housings:

Machined Housings are used in the Telecom, military and medical industries for packaging devices, RF/EMI shielding in microwave frequencies and as heat sinks. Machined housings are commonly made from aluminum or brass, typically plated and an EMI/Environmental gasket is attached. MnS can provide a complete turn-key solution.

### Sheet Metal products:

Sheet metal components, panels and miscellaneous parts are used in many industries for a variety of reasons. Front panels can be used for the identification of the company and the device features. MnS provides laser cutting, forming, welding, assembly, plating, painting and silk screening.

### Extrusions:

Extrusions are a cost effective method of packaging devices. MnS will work with the client to provide the extrusions, machine and add any other necessary features to them. MnS doesn't only offer extrusions, we offer a turn-key solution, reducing lead times and eliminating the need to manage various suppliers.

### Secondary machining:

Secondary machining operations of extrusions, die castings or other components are also available. MnS receives client product, executes the necessary manufacturing processes to meet client requirements, and ships to the desired location.

### Miscellaneous parts:

Regardless of the product, whether the operation is machining, turning, fabrication, assembly or any other service, MnS looks forward to meeting your expectations.

*When precision matters...*

*When delivery lead times matter...*

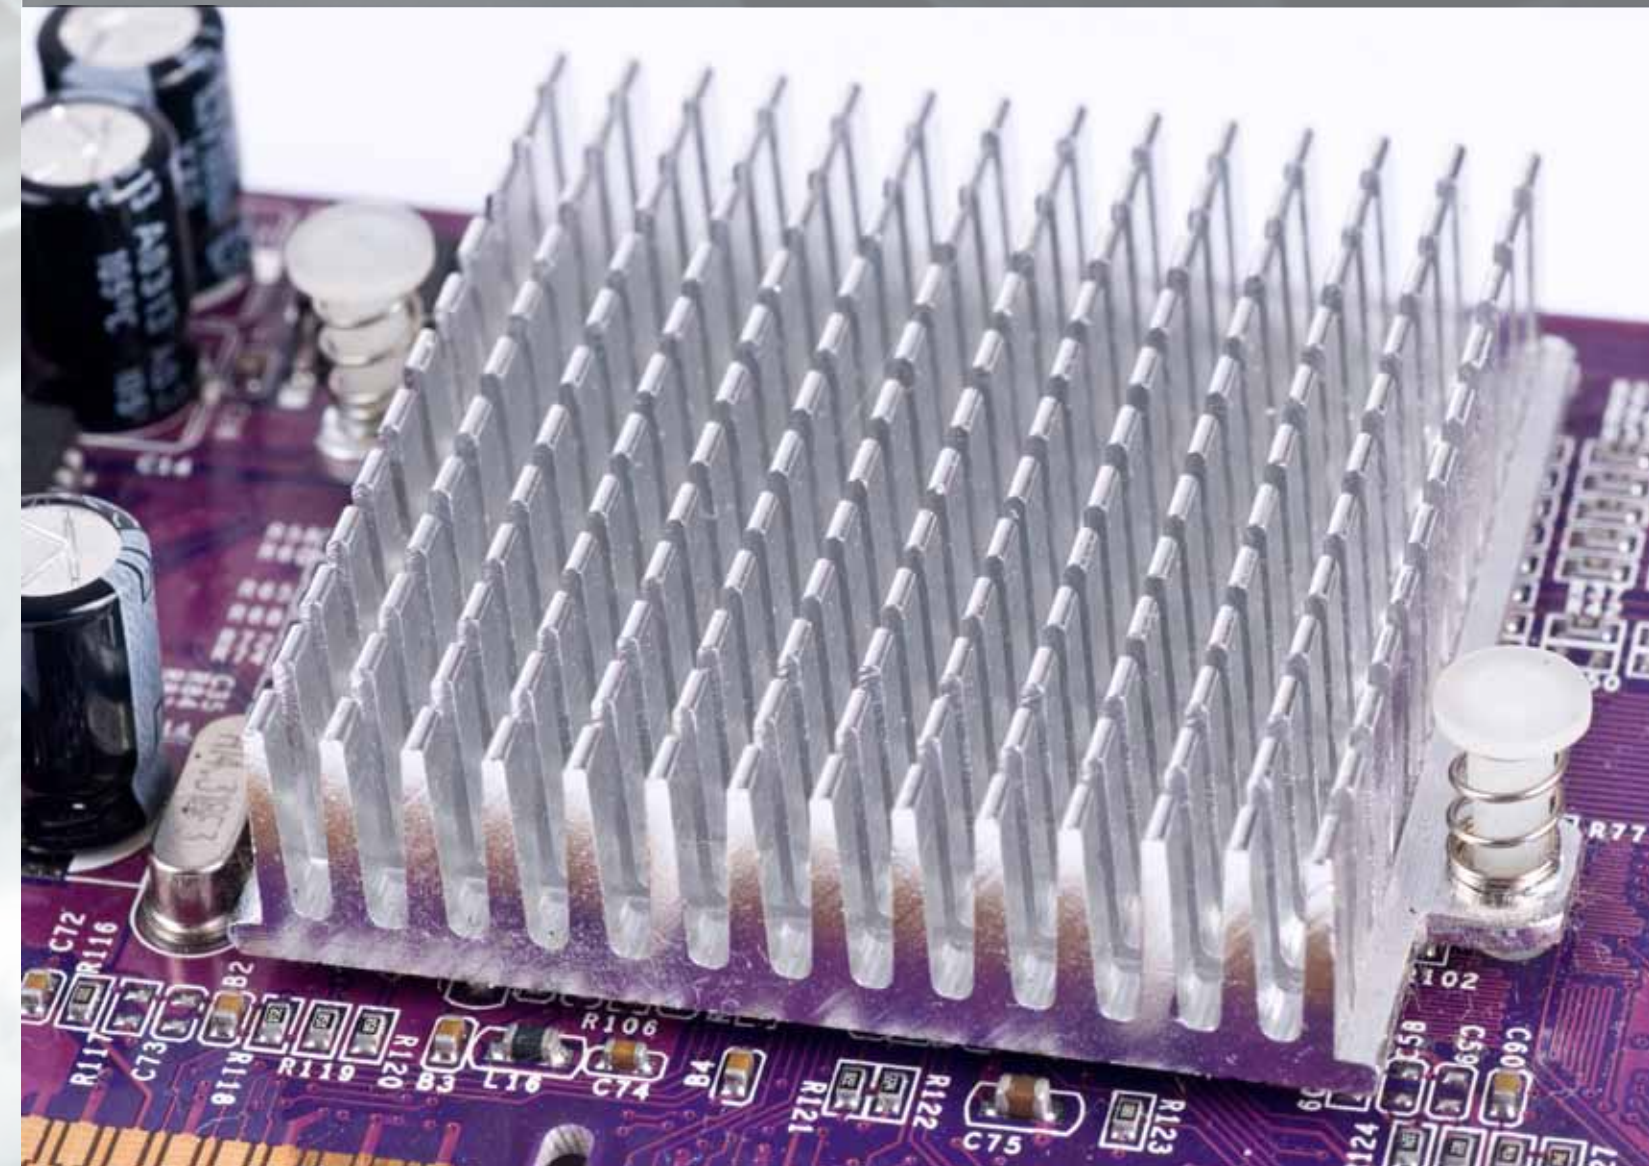

*When you need someone that understands what you are looking for...*

*MnS Industries is your metalworking partner.*

## Manufacturing capabilities

- Laser Cutting
- Forming (Bending)
- Welding
- Painting (powder coat/ or wet paint)
- Silk Screening
- Machining
- Turning
- Extrusions
- Plating

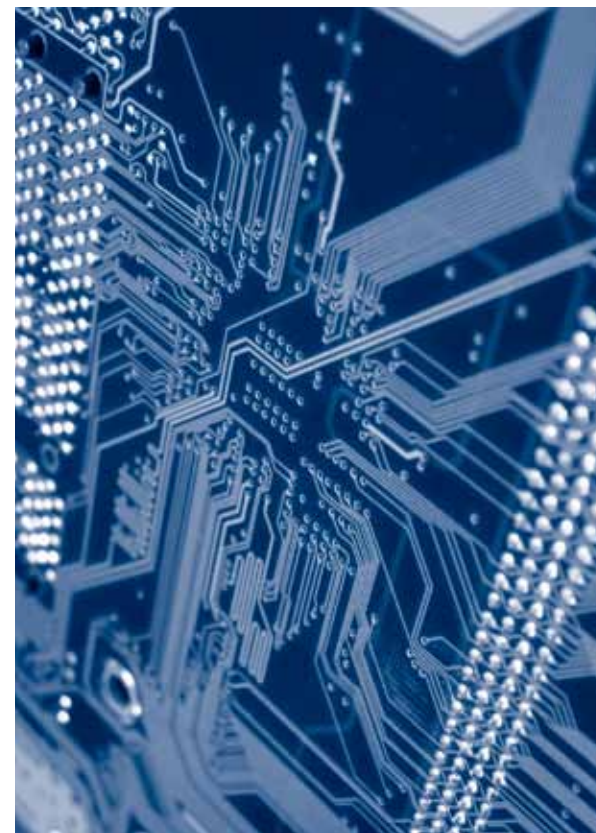

At MnS Industries, we are an engineering company first, manufacturing partner second. Regardless of what stage in the design cycle you are in, we look forward to contributing our expertise as a part of your design team. MnS Industries is engaged in the design and manufacturing of custom sheet metal fabrications and machined components for the electronic and aerospace industries. When quality, precision or responsiveness cannot be compromised, MnS Industries is the supply partner of choice. Regardless of the quantity needed, MnS will support your metal working needs from prototype to production and from first piece to last.

## Who We Serve / What We Do

MnS serves the Electronics, Medical, Telecom and Aerospace industries. We have the expertise to understand the lead times required, the precision necessary and repeatability needed. MnS can provide the service necessary to meet your requirements and exceed your expectations. Our clients range from start ups to fortune 100 companies, all sharing the same requirements; a supply partner that can understand their metalworking needs, provide a solution and make the experience hassle free.

Whether you require a quote on an existing product or design assistance on a new application, contact us now as we look forward to fulfilling your needs.

## Design Capabilities

MnS accepts files in AutoDesk "DWG, DXF", Solidworks and ProE solid models, Gerbers, PDF or doodles on a napkin. Whether it's an existing product that needs to be reverse engineered, a specification that needs to be met, or even if your needs are yet to be determined, our engineers at MnS look forward to supporting you.
